Rexam is a leading global beverage can maker in Europe and South America and number 2 in the US. They make around 60 billion cans each year at 57 can and end making plants across the world.

Energy-efficient lighting specialists Lutterworth Ecolighting were called in to give advice on the potential energy saving opportunities across their distribution facility in Milton Keynes.

Following a product trial to prove the energy savings, Lutterworth Ecolighting was awarded a contract to provide lighting at the facility.

Lutterworth specified their Industrial Hi-Saver with energy saver lamps for all areas, each with its own built in programmable high bay PIR & daylight harvesting sensor. **A return on investment is forecasted in 1.8 years**, Light levels were also significantly increased in all areas providing a better working environment.

Michael Reed, Logistics supply chain manager, was so impressed with the, energy saving, light levels and professionalism of the company, he is looking to recommend a roll out programme within the business.
